SOURCE [REDACTED]

1. The manufacture of hectograph paper in the Soviet Zone of Germany came to a standstill in January 1951. The manufacturing firms advised the customers that the delay in the delivery was due to a shortage of crystal violet powder. The shortage of hectograph paper affected the designing offices of a number of enterprises in the Soviet Zone of Germany among which was the Loma Plant in Wildau, the OSW in Berlin-Oberschoene-weide and the rolling mill in Hettstedt (M 52/D 64).
2. The Badische Anilin and Soda Plant in Ludwigshafen delivered 25,688 kg of crystal violet powder to the VOB Zentrage/DB in March 1951. From this shipment 45,000 sheets of hectograph paper were made for immediate delivery to the above-mentioned enterprises.
3. One Heinz Guenter, 109 Buschkrug-Allee, Berlin-Britz, has frequently served as agent of the VOB Zentrage/DB. In this capacity he procured scarce goods for the VOB Zentrage/DB and made remittances for goods delivered. He also effected transactions between the Badische Anilin and Soda Plant and Kores Buerrochemie Ltd in Waldheim (N 52/K 78), Saxony, and between Partenteimer and Verges, 11-14 Bandlerstrasse, Berlin W 35, and Druckbedarf in Berlin. \*
